The Attributes of the Cosmic Parents and their Form of Expression in the Duality and the Divine Reality

OMAR TA SATT dear Lightworker,

Your essence which you as great light on Earth are carrying within is anchored in an energy field in the universe. This energy field is called origin by the spiritual world. This origin includes everything, your whole matrix as well as the task for which this energy field was created. At one time a part separated from this energy field in order to experience itself and to incarnate in the most various ways. This is the divine core which you carry within. It is unique and gives you your personality, your characteristics and your divinity. This origin which you come from was created in the universe by your cosmic parents.

Your cosmic parents carry special attributes within and pass these on to you during the process of creating your origin. It is similar to your earthly parents of whom you have inherited certain genes. And in the same way you also receive parts and characteristics of your cosmic parents. This message is new in many respects. But the information that each human being has cosmic parents is spreading more and more among the human beings. It is also important to know that each origin received its name during its creation - the original name. However, this name has nothing to do with the soul name. During the 48 Steps it is mentioned repeatedly how important it is to use your original name as it contains the vibration which decodes your DNA and makes you aware of your divine Self.

The 36 High Councillors of the Light transmitted the message that, due to the rising vibration of Lady Gaia the cosmic parents will have a stronger and stronger effect and that especially the pioneers of the light will feel the attributes of their cosmic parents stronger. I am often asked why spiritual beings carry different attributes within. I would like to go into that briefly.

Each being in the universe has a task and is in its own frequency. As all beings are working together in love there is an oneness to which you are also connected. I channel original names, their meanings, the cosmic parents and the origin for Kryonstudents every day. Since the High Councillors of the Light have conveyed the message that the cosmic parents are having a stronger and stronger effect many

human beings want to know which attributes their parents carry within. Hence I have decided to write down the characteristics of various cosmic parents.

You should know that there is a difference between the Divine Reality and the duality. Thus it may be that characteristics express themselves differently in the Divine Reality than they do in the duality. But the more you are in the Divine Reality and absorb the vibration of the Divine Reality the stronger you can feel the attributes of your cosmic parents and then express them in the duality.

Wishing you lot of ANA (Light) and TAN'ATARA (Zest for Life) while you are reading,

Sabine Sangitar

Melek Metatron and Shakti

The attributes of Melek Metatron and Shakti are, first and foremost, wisdom, knowledge, courage, power and strength. Beings which have been created by Melek Metatron and Shakti were teachers and guides in many incarnations.

In the duality these people can often think they do not feel and see enough. Sometimes their highly developed mind stands in their way and some people can allow feelings only with difficulty.

When these human beings expand and awaken, however, then they cannot be stopped. Often they are steadfast human beings with enormous realizations and great knowledge.

Angel Uriel and Angelika Lea

The energy of Angel Uriel and Angelika Lea is might, clarity, joy and perseverance.

In the duality these human beings can sometimes feel torn. Especially the human beings who are still sleeping do not dare to live their divine might. It can also happen that these human beings then live out their might on the human level.

But the more these human beings expand and awaken the more they realize their grandness. These human beings are full of clarity, without doubt and let the miracles happen within.
